Vision

Our vision is to create a world where communities are empowered to respond to crises and disasters in a timely and effective manner, using technology as a key enabler.

Mission

At AYA, our mission is to provide innovative and accessible technological solutions that support disaster response efforts and empower communities in times of crisis. We believe that technology can play a crucial role in disaster response, and we are committed to building open-source tools that enable rapid and effective communication, data collection, and coordination among responders, volunteers, and affected communities.

Our core values include collaboration, empathy, and innovation, and we strive to embody these values in all aspects of our work. We are dedicated to building a diverse and inclusive community of volunteers, partners, and stakeholders who share our commitment to leveraging technology for the greater good.
